ITEM	SPECIFICATIONS
1	<p>DEWORMER, for veterinary use, oral suspension, with active ingredient mebendazole 5g/100ml.</p> <p>Packaging: 30ml bottle labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.</p>
2	<p>ANALGESIC, for veterinary use, with active ingredient butorphanol 14,58 mg/ml, injectable solution.</p> <p>Packaging: 20 ml bottle labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.</p>
3	<p>DEWORMER, for veterinary use, with active ingredients praziquantel 50mg, pyrantel pamoate 144mg and febantel 150 mg, q.s. 660 mg, oral.</p> <p>Packaging: 4-pill blister pack packaged in aluminum envelopes labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.</p>
4	<p>DEWORMER, for veterinary use, with active ingredients febantel + pyrantel pamoate, solution.</p> <p>Packaging: 20 ml bottle labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.</p>
5	<p>PARASITICIDE, for veterinary use, with active ingredient fipronil 0,25 mg/100 ml, topical solution.</p> <p>Packaging: 250 ml aerosol can labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.</p>
6	<p>ANESTHETIC, for veterinary use, injectable, with active ingredient ketamine 10%.</p> <p>Packaging: 50 ml can labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.</p>
7	<p>ANTIBIOTIC, for veterinary use, injectable, micronized cefiofur hydrochloride 5 mg.</p>

STATE SECRETARIAT FOR INFRASTRUCTURE AND ENVIRONMENT

	Packaging: 100 ml recipient labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.
8	ANTI-INFLAMMATORY, antipyretic, anti-endotoxin and ANALGESIC, veterinary use, with active ingredient Flunixin (meeglumine) - 5,0 g, Vehicle q.s. 100,0 ml. Packaging: 50 ml glass bottle labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.
9	ANTIPYRETIC, for veterinary use, injectable, with active ingredient sodium dipyrone 50g/100 ml. Packaging: 100 ml bottle labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.
10	ANESTHESIC, for veterinary use, with active ingredient xylazine hydrochloride, 2% injectable solution, Packaging: 10 ml bottle. This medication is to be registered at the Ministry of Agriculture.
11	ANTIEMETIC, for veterinary use, injectable, with active ingredient metoclopramide. Packaging: 50 10 mg/2ml ampoule carton labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.
12	ANTIBIOTIC, for veterinary use, injectable, with active ingredients penicillin, G benzathine, G procaine, G potassium and streptomycin (sulfate). Packaging: Bottle containing 8.4 g plus one diluent ampoule labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture
13	ANTI-INFLAMMATORY, for veterinary use, with active ingredient dexamethasone. Packaging: 20 ml bottle labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture
14	ANESTHESIC, local, for veterinary use, with active ingredients lidocaine 2% and epinephrine 0,002g. Packaging: 50 ml bottle labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture

STATE SECRETARIAT FOR INFRASTRUCTURE AND ENVIRONMENT

15	<p>ANTIBIOTIC, broad spectrum bactericide, injectable, veterinary use. Active ingredients per 1 ml: ampicillin sodium 200mg, vehicle q.s. 1 ml</p> <p>Packaging: ampoule bottle with a 2g active ingredient and 10 ml diluent, labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture</p>
16	<p>ANTI-INFLAMMATORY, injectable, for horses. Active ingredient per 100 ml: Meloxicam 2 g; vehicle q.s.</p> <p>Packaging: 50 ml ampoule bottle labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.</p>
17	<p>ANTIBIOTIC, for veterinary use, with active ingredient sulfamethoxazole trimethoprim.</p> <p>Packaging: 50 ml bottle labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture</p>
18	<p>ANTIBIOTIC, for veterinary use, injectable, with active ingredient enrofloxacin 5g, vehicle q.s. 100ml.</p> <p>Packaging: 10 ml bottle labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.</p>
19	<p>ANTIBIOTIC, for veterinary use, with active ingredient Benzylpenicilin, G Procaine 10.000.000 UI, Benzylpenicillin, G Benzathine.... 10.000.000 UI, dihydrostreptomycin (Sulphate)...20,0g, e Vehicle q.s....100,0ml, injectable solution.</p> <p>PACKAGING: 50 ml amber glass ampoule bottle in blister packs, without a diluent, with a 24-month expiry date effective the manufacturing date. Registered at the Ministry of Agriculture and Food Supply under number 9.125 of July 27, 2009.</p>
20	<p>ANTIBIOTIC, for veterinary use, with antibacterial active ingredient cephalexin of the cephalosporin class, and whose active nucleus is 7-aminocephalosporanic acid.</p> <p>Packaging: Pack containing 24 300 mg cephalexin tablets each, without a diluent, with a 24-month expiry date effective its manufacturing date. Registered at the Ministry of Health under number 7.299 on April 24, 2000.</p>
21	<p>ANTIBIOTIC, for veterinary use, with active ingredients containing sodium, injectable solution containing 80 mg plus 10 ml of water-soluble diluent for applying injections.</p>

STATE SECRETARIAT FOR INFRASTRUCTURE AND ENVIRONMENT

	Glass bottle containing 80 mg of cefovecin sodium plus a soluble 10 ml bottle for injecting, with an expiry date of 24 months effective its manufacturing date. Registered at the Ministry of Agriculture under number 9.364 on December 26, 2007.
22	<p>ANTIBIOTIC, for veterinary use, with active ingredients Penicillin, Diclofenac and Streptomycin, injectable solution.</p> <p>PACKAGING: Ampoule bottle containing 8,4 of powder, together with a 15 ml diluent ampoule conditioned in blister packs, with an expiry date of 24 months effective its manufacturing date. Registered at the Ministry of Agriculture under number 6.330 on March 13, 1998.</p>
23	<p>ANTIBIOTIC, for veterinary use, with active ingredients urea, Penicillin and dihydrostreptomycin, topical solution.</p> <p>PACKAGING: 50 g tube, whereas each 50 g tube contains Penicillin, G benzathine 1.250.000 Ui, Penicillin G Procaine 1.250.000 UI, Dihydrostreptomycin (Sulphate) 1,25 g, Urea 2,50 g, with an expiry date of 24 months effective the manufacturing date. Registered at the Ministry of Agriculture under number 15.98 on May 4, 1960.</p>
24	<p>ANESTHESIC, for veterinary use, with active ingredient isoflurane, 100g/100ml concentration.</p> <p>PACKAGING: 250 ml amber glass labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.</p>
25	<p>SALINE SOLUTION, for veterinary use, with a 0,9% saline solution.</p> <p>PACKAGING: 500 ml bottle labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.</p>
26	<p>ANESTHESIC, for veterinary use, injectable, with active ingredients tiletamine (hydrochloride)/zolazepam (hydrochloride), both in the 125 mg/5 ml concentration.</p> <p>Packaging: Blister with package insert containing 1 lyophilized ampoule bottle and 1 ampoule bottle with a 5 ml diluent. Labelling shall include information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.</p>
27	ANESTHESIC, for veterinary use, injectable tiletamine (hydrochloride)/zolazepam (hydrochloride) solution, both in the 250mg/5ml concentration.

STATE SECRETARIAT FOR INFRASTRUCTURE AND ENVIRONMENT

	Packaging: Blister with package insert containing 1 lyophilized ampoule bottle and 1 ampoule bottle with a 5 ml diluent. Labelling includes information identifying the product and the manufacturing brand, the manufacturing date, expiry date and registration number issued by the Ministry of Health and/or Agriculture.
28	ANTIBIOTIC, for veterinary use, a base de gentamicina (como sulfato). Packaging: 100 ml bottle labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.
29	ANTIBIOTIC, for veterinary use, oral, suspension, with active ingredient doxycycline 5 mg/ml. Packaging: 60ml bottle labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.
30	ANTIBIÓTIC, for veterinary use, injectable, with active ingredient doxycycline hydrochloride 4g. Packaging: 20 ml bottle labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.
31	ANTIBIÓTIC, for veterinary use, 10% enrofloxacin-based, injectable solution. Packaging: 50 ml bottle labeled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.
32	SCAR CREAM, for veterinary use, with active ingredient allantoin. Packaging: 250g jar labeled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.
33	SALINE SOLUTION, for veterinary use, with active ingredient dextrose 5%. Packaging: 500 ml bottle labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.
34	SEDATIVE, for veterinary use, injectable, with active ingredient acepran 1%. Packaging: 20 m bottle labeled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.

STATE SECRETARIAT FOR INFRASTRUCTURE AND ENVIRONMENT

35	ANTI-INFLAMMATORY, for veterinary use, injectable, with active ingredient ketoprofen 1%. Packaging: 10 ml bottle labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.
36	ANTI-INFLAMMATORY, for veterinary use, injectable, with active ingredient ketoprofen 10%. Packaging: 50 ml bottle labelled with information identifying the product and the manufacturing brand, the expiry date and registration number at the Ministry of Health and/or Agriculture.
37	ANTIPARASITIC, for veterinary use, oral paste with active ingredient ivermectin praziquantel and vitamin E. Packaging: 9,6 g ml tube labeled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.
38	LARVICIDE, for veterinary use, topical use, aerosol spray, with active ingredient silver sulfadiazine 0,1 neomycin and aluminum 5 g. Packaging: 500 ml tube labelled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.
39	GASTROPROTECTANT, for veterinary use, oral, 20,0 mg capsule, with active ingredient omeprazole. Packaging: bottle with 30 capsules labeled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.
40	Joint REGENERATOR for veterinary use, oral, 1000 omega 3 and omega 6 and L capsules. Packaging: bottle with 60 capsules labeled with information identifying the product and the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.
41	SALINE SOLUTION, for veterinary use, lactated ringer's solution, for veterinary use. 50 ml packaging labelled with information identifying the product, the manufacturing brand, the expiry date and registration number issued by the Ministry of Health and/or Agriculture.
